DOCUMENTARY EVIDENCE FOR

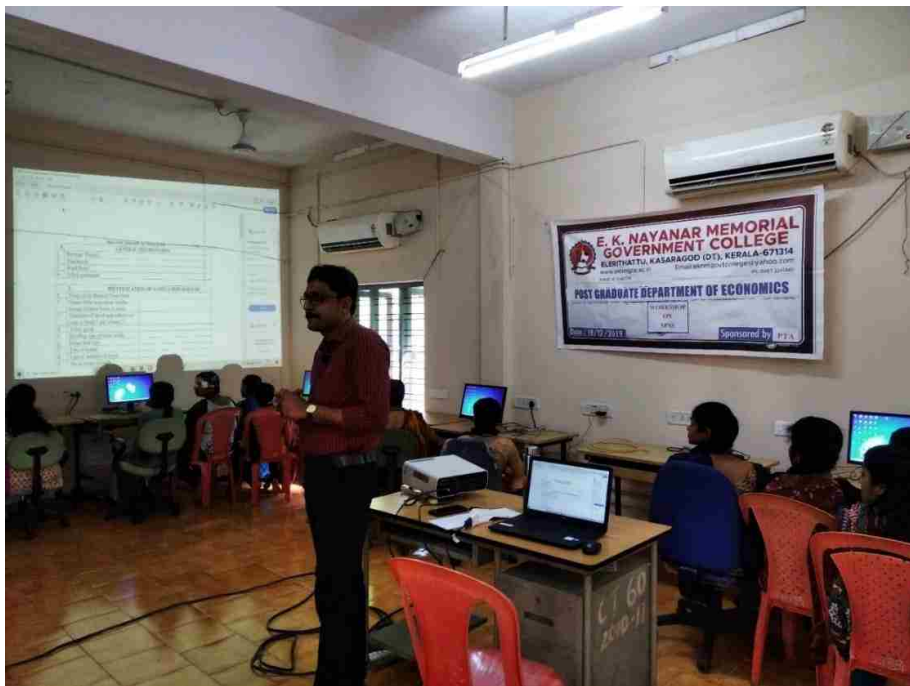

2.3.1. Student centric methods, such as experiential learning, participative learning and problem-solving methodologies are used for enhancing learning experiences and teachers use ICT- enabled tools including online resources for effective teaching and learning process

HANDS ON TRAINING TO STUDENTS IN VARIOUS SOFTWARE PACKAGES

HANDS ON TRAINING TO STUDENTS IN VARIOUS SOFTWARE PACKAGES

Hands-on training is an active learning approach where individuals gain knowledge and skills through direct experience and practice rather than just listening or reading. Hands-on training in software packages gives the trainee the chance to actually use the software and learn by doing rather than by passively taking information on board through a lecture. It allows users to experience the interface firsthand and better understand how it works or how it can help them achieve their business goals. Several sessions of training have been conducted in every academic year for equipping the students with a better and deeper understanding in handling the database.

Training Session on SPSS organised by PG Department of Economics 18/12/2019

Training Session on Gretl Organised by P G Department of Economics on 23/11/2019
