DOCUMENTARY EVIDENCE FOR

2.3.1. Student centric methods, such as experiential learning, participative learning and problem-solving methodologies are used for enhancing learning experiences and teachers use ICT- enabled tools including online resources for effective teaching and learning process

LEARNING BY DOING

LEARNING BY DOING

Learning by doing is a theory that places heavy emphasis on student engagement and is a hands-on, task-oriented, process to education. The theory refers to the process in which students actively participate in more practical and imaginative ways of learning. It is based on the practice of the work performed in order to stimulate the activity, motivation and participation of students, sharing ideas in workgroups and developing a fair self-assessment. The 'learning by doing' methodology prioritises practice over theory during the learning process. Many programmes have been conducted by the institution on a regular basis to enrich the students real life experience and some of them are presented below.

Organic Farming under the leadership of NSS Units of the College

Inaugural session of one day workshop on LED bulb assembling organised by Department of Physics on 21/11/2019

Students Participation in Anti- Drug Campaign Organised by the College Union

Flash mob to sensitise the problems of Gender Inequality
