Name of the workshop/ seminar/ conference: Webinar on Research in Political Science

**Report on the webinar organised by the
DEPARTMENT OF POLITICAL SCIENCE**

On 13th November 2020

2020-2021 Academic Year

Department of Political Science Successfully organised a webinar on '*Research in Political Science*' at 4.00 PM on 13-11-2020. The webinar was arranged on Google Meet platform. We had received 73 registrations for our programme from teachers, students and scholars. The registration for the programme was free and no expenses were taken from any sources for the programme. The resource person for the programme was Dr. Sabu Thomas, Assistant Professor, Post Graduate Department of Political Science, Government Brennen College, Thalassery, Kannur.

The webinar started with welcome address by Ganesan D A, Assistant Professor & Head, Department of Political Science, EKNM Government College, Elerithattu. The programme was formally inaugurated by the Principal, EKNM Government College. Dr. Jaison V Joseph IQAC Coordinator & PTA secretary gave the felicitation speech. This was followed by the invited talk for about one hour by Dr. Sabu Thomas on **Research in Political Science**.

The talk was very much informative. The talk was followed by interactive session with the resource person which lasted for 15 minutes. At the end of the webinar, on behalf of the department Sasi C T, HoD of History, EKNM Government College, expressed gratitude to all participants who made it a successful programme. The department issued e - certificate to all participants. Brochure, Photos, sample e-certificate and list of participants are attached with the report.

About the topic

The seminar on "Research in Political Science" aims to provide participants with a comprehensive understanding of the methodologies, trends, and challenges in political science research. By exploring topics such as research design, data collection and analysis, emerging trends, and ethical considerations, the seminar aims to foster a deeper appreciation for the complexities of political phenomena and inspire innovative approaches to addressing contemporary political challenges.

Name of the workshop/ seminar/ conference: Precursory signals of earthquakes and tsunami forecasting systems

**Report on the National webinar organized by
DEPARTMENT OF PHYSICS
on September 23, 2020**

The Department of Physics successfully organized a National Webinar on "*Precursory signals of earthquakes and tsunami forecasting systems*" at 10:00 AM on September 23, 2020. The webinar was arranged in Google Meet platform. We have received immense response from teachers, students and other science aspirants across India. There were 156 registrations for our programme out of which 88 participants were from States outside Kerala. The registration for the programme was free of cost and no expenses were taken from any sources for the entire programme. The resource person for the webinar was **Dr. Sunil Kumar A. S., Research Associate, Indian Institute of Geomagnetism, Navi Mumbai** (sunilk11@iigs.iigm.res.in, Ph:+91-22-2748-4156).

The webinar was started with the welcome address by the Assistant Professor and Head of the Department, Dr. Rohith M. The programme was formally inaugurated by **Dr. Jijo P. U.**, Assistant Professor and Head of the Department of Physics, Government College Kasaragod. Dr. Jaison V. Joseph (IQAC Coordinator) and Shri. Rethesh P. K. (Assistant Professor, Department of Economics) given the felicitations for the webinar. This was followed by an exciting invited talk on "*Precursory signals of earthquakes and tsunami forecasting systems*" by the resource person for about one hour.

➤ Abstract of the talk:

Earthquakes generally occur along the tectonic plate boundaries. The formation mechanism of earthquakes can be explained using the theory of plate tectonics. In some cases, the sudden release of energy during earthquakes generates tsunamis. Large earthquakes and tsunamis can cause severe destruction and devastation to life and property. In this talk, the basic concepts behind the earthquake and tsunami formation will be discussed. In addition to that, there will be a discussion on the recent developments in the field of earthquake precursory studies and tsunami forecasting systems.

The talk was very informative and the topic covered was relevant in the current research across the world where the scientists have been trying to enhance the efficiency of predictions on earthquakes and tsunamis. The talk was followed by an interaction session with the resource person which lasted around half an hour. There were many questions from undergraduate students from our department as well as students from the institutes all over India. On behalf of our department, Shri. Hareendranathan P., former Guest Lecturer in our department expressed the vote of thanks to all the participants and concluded the webinar. The department issued e-certificate for all the

participants. A list of participants registered for the webinar, brochure and a sample e-certificate of the webinar is attached with this report.

To conclude, the webinar provided a platform for our undergraduate students to interact with the resource person from a National level Institute and also got an opportunity to get acquainted with the recent developments in **the** field of earthquake precursory studies and tsunami forecasting systems. Our department thank all the support received from **the** Principal, IQAC and the administrative section of the college, in making this event possible and memorable.

Dr. Rohith M.

Radon as an earthquake precursor

- Two samples from same region, low porosity and relatively high strength crystalline lava (phonolite) and loosely consolidated and highly porous tuff.
- Negative radon anomalies can be explained by the deformation of loosely consolidated and/or highly porous rocks.
- Lack of significant variation in radon emanation can be due to the presence of low porosity crystalline materials.

National Science Day Celebration

Report on the webinar series organized by

DEPARTMENT OF PHYSICS

on February 26, 2021

The Department of Physics, EKNM Government college Elerithattu, in connection with **National Science day celebrations** launched a Webinar series on “**Concepts of modern Physics**”. The first talk in the webinar series was started with the welcome address by the Assistant Professor and Head of the Department, Dr. Rohith M. at 06:00 pm on 26th February 2021. The programme was formally inaugurated by **Dr. P. A. Subha.**, Former Head of the Department of Physics, Farook College, Kozhikode. As a part of the inaugural address, Dr. P. A. Subha presented the importance of Raman spectroscopy, the story behind Raman Effect and she mentioned the future options for the UG and PG students in their carrier. Her talk was about 30 minutes. The webinar was arranged in Google Meet platform. The registration for the programme was free of cost and no expenses were taken from any sources for the entire programme. There were 147 participant registrations for the programme. The first talk in the webinar series was on the topic: “*Basics of Raman Spectroscopy*”. The resource person for the webinar was **Dr. A. K. Sivadasan., (Recipient of outstanding doctoral thesis award, HBNI)**, Assistant Professor, Government Polytechnic College, Perinthalmanna, Malappuram, Kerala ,India. Dr. Jaison V. Joseph (IQAC Coordinator) given the felicitation for the webinar. This was followed by an exciting invited talk on “*Basics of Raman Spectroscopy*” by the resource person for about one hour.

Abstract of the talk:

Inelastic scattering of light due to the change in polarisability of a molecular scatterer is known as Raman Effect. It is an important characterisation tool for Nano science and technology. The talk was followed by an interaction session with the resource person which lasted around half an hour. There were many questions from undergraduate students from our department as well as teachers from other colleges. On behalf of our department, Dr. Usha K., Assistant Professor in our department expressed the vote of thanks to all the participants and concluded the webinar. The department issued e-certificate for all the participants. A list of participants

registered for the webinar, brochure and a sample e-certificate of the webinar is attached with this report. To conclude, the webinar provided a platform for our undergraduate students to interact with the resource person who is an expert in the field. Our department thank all the support received from the Principal, IQAC and the administrative section of the college, in making this event possible and memorable.

Dr. Rohith M.
Assistant Professor and Head

Career in major institutes

- 1919- 1933 C.V Raman : IACS, Kolkata
He discovered scattering of light with his student K.S. Krishnan
- 1933 to become its first Director Of IISc Bengaluru
- After retirement from IISc, He founded Raman research Institute, Bengaluru

Question asked himself by CV Raman in a Sea Journey

- In 1921: Professor at the University of Calcutta
- Delegate to the **International Universities Congress** in London.
- While returning : He asked himself as he gazed out at the bright blue waters of the **Mediterranean Sea**

"A glass of water does not have any colour of its own. But the same water in the deep sea appears a brilliant blue. Why is this so?"

The sea looks blue for the same reason as the sky looks blue: the water was causing blue light to scatter more than other colours in the light.

- Excited by this realization, Raman wrote to *Nature* (a premier science journal) as soon as he arrived in India.
